PROFESSIONAL SUMMARY

Full-Stack Developer with 2 years of experience building production-grade web applications. Works equally across frontend and backend — React.js and Next.js (App Router, Server Components) on the frontend, Node.js/Express.js with PostgreSQL on the backend. Shipped multi-tenant SaaS platforms, AI-powered content tools integrating multiple LLM providers, real-time systems using Socket.io, and a live media platform serving D2C brands across India. Comfortable owning complete features from schema design to UI. Actively uses AI tools (Claude, ChatGPT, Gemini) to write, debug, and ship code faster.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router, Server Components, Server Actions), TypeScript, Tailwind CSS, React Query, Zustand

Backend: Node.js, Express.js, REST APIs, Socket.io

Database: PostgreSQL, Drizzle ORM, Sequelize ORM, MongoDB (familiar), SQLite, Schema Design

AI Integration: Gemini API, Groq API, Minimax (video generation), LLM prompt design

Deployment & Tools: Linux (Ubuntu daily user), PM2, Git, GitHub, Supabase — deploying apps to remote Linux servers and managing processes

AI-Assisted Development: Actively uses Claude, ChatGPT, and Gemini for code generation, debugging, and problem-solving to ship faster

Core Concepts: RBAC, Database Schema Design, Real-time systems, API Integration

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Bluehorse Software Solutions Pvt. Ltd. *May 2023 – Present*

- Worked as a balanced full-stack developer across 4–5 production applications in B2B SaaS, media, and mentorship domains — contributing equally to frontend and backend on every project.
- Built feature-rich admin panels and data-driven dashboards using React.js and Next.js App Router, handling complex UI states and dynamic workflows.
- Designed and implemented reusable component systems and dynamic form engines to support multi-step, configurable business workflows.
- Built backend APIs with Node.js/Express.js and designed PostgreSQL schemas using Sequelize and Drizzle ORM, including complex joins, multi-tenant data isolation, and advanced query filtering.
- Implemented real-time bi-directional features using Socket.io (live chat, notifications).
- Handled deployment for two projects independently — setting up apps on remote Linux servers, configuring PM2 for process management, and handling ongoing maintenance.
- Received Promising Performer Award (2024) for contributions to product delivery.

OTHER EXPERIENCE

- **Web Development Instructor (Trainee)** — NTTF, Bangalore · ~6 months, 2023 Taught web development fundamentals (HTML, CSS, JavaScript, Java) to students as part of a trainee instructor role.
- **Full-Stack Development & Testing Training** — QSpiders · 7–8 months, 2022–2023

PROJECTS

Beyondnmore — PIM (Product Information Management) platform · Next.js · Express.js · PostgreSQL · TypeScript · Clerk · Drizzle ORM

- Built a full-stack B2B platform enabling multiple business clients to manage product catalogs with fully dynamic, configurable attribute schemas — no fixed product structure.
- Designed PostgreSQL schema supporting 50+ dynamic attribute types per product, with flexible EAV-style relationships and multi-tenant data isolation across clients.

- Implemented a dynamic advanced filtering engine supporting compound AND/OR query logic across any combination of attributes — built both the backend query builder and the frontend filter UI, allowing clients to slice product data with complex, nested filter conditions.
- Built RBAC system (User–Role–Module) with fine-grained permission control using Clerk for authentication; developed backend controllers for user, role, and module management.
- Worked as part of a 2-person team, owning both frontend (Next.js) and backend (Express.js) layers.

TezCommerce AI — AI-Powered Product Content Platform · *Next.js · Node.js · PostgreSQL · Gemini · Groq · Minimax · TypeScript*

- Built an AI content generation platform for e-commerce sellers to auto-generate product titles, descriptions, attributes, and SEO metadata at scale.
- Integrated 3 AI providers with task-specific routing: Gemini for high-quality text content, Groq for low-latency fast inference, and Minimax for AI video generation.
- Implemented Minimax video generation pipeline with async batch processing and polling — handling async job queues without blocking the UI.
- Built a rule-based SEO scoring engine that analyses generated content and surfaces structured improvement suggestions.
- Optimised data fetching using Next.js Server Components, Server Actions, and React Query to reduce client-side waterfalls.
- Worked as part of a 2-person team, contributing across frontend, backend, and database layers.

Creoo — Mentorship Platform · *Next.js · React · Express.js · PostgreSQL*

- Built and maintained admin panel for managing mentors, learners, session scheduling, and user lifecycle workflows.
- Designed and implemented backend REST APIs and PostgreSQL data models for core platform entities (users, sessions, bookings).
- Contributed equally across frontend admin UI and backend API development.

D2C Stories — D2C Brand Media Platform (Live) · *Next.js · Express.js · PostgreSQL · Socket.io · React Query · TypeScript* d2cstories.com

- Primary developer from initial setup — led architecture decisions, database schema design, authentication, and deployment; contributed the majority of frontend and backend work within a small team.
- Built a Typeform-inspired multi-step brand registration form engine from scratch — supports multiple questions per step, nested object-style structures, rich data types, and multi-layered validation rules.
- Implemented real-time chat using Socket.io with room-based architecture for community messaging between brands and enablers.
- Built the complete admin panel covering brands, enablers, events, content, and user lifecycle — both UI and all backend APIs.
- Deployed to production Linux server with PM2; platform is live serving real D2C brand users across India.

EDUCATION

B.Tech — Computer Science & EngineeringBBIT, MAKAUT

Maulana Abul Kalam Azad University of Technology

Diploma — Computer Science & TechnologyCentral Calcutta Polytechnic

ACHIEVEMENT

Promising Performer Award — Bluehorse Software Solutions, 2024
